

NOTABLE | LEADERS IN HEALTH CARE TECHNOLOGY

Across metro Detroit, researchers, administrators and doctors are finding innovative ways to apply technology to patient care and health care service. These leaders are embracing technology to advance therapies for rare diseases, help children through isolating treatments, create systems to make health care more efficient, and bridge gaps in access to care.

And it's not just individuals inside the health care system making a difference. Architects and advocates are also on the cutting edge of new developments in the health care field, building and shaping hospitals and the industry of the future. Across the board, these leaders are making significant contributions to their field while making a difference in their personal and professional communities through mentorship, board service and volunteerism.

METHODOLOGY: Crain's Notable Leaders in Health Care Technology includes only individuals for whom nominations were submitted and accepted after a review by editors. The individuals featured did not pay to be included. To qualify for the list, which is not comprehensive, nominees must serve in a senior leadership role at their firm and be in the profession for a minimum of five years, as well as demonstrate significant impact in their organization and in the community. Their profiles were written from the nomination materials submitted. Some of the profiles in this feature were written with the assistance of generative AI based on provided information. Our editorial team carefully reviewed and edited the AI-generated text to ensure it aligns with our standards for accuracy. Honorees can appear in up to two Notable features per calendar year. Notables is managed by Amy Barczy, assistant managing editor. For questions about Crain's Notables program, please email detroitrecognitions@crain.com.

2025 Honorees

Tom Dillenbeck

Executive Vice President
Hobbs+Black Architects

Jennifer Fisher

Development Director
Maggie's Wigs 4 Kids of Michigan

Mike Forman

Director of Health Informatics
Trinity Health

Dr. Todd C. Hollon

Jennifer Fisher

Development Director, *Maggie's Wigs 4 Kids of Michigan*

Scope of work: Fisher coordinates wig recipient appointments, develops classes and activities, and manages the VR 4 Kids Program.

Biggest professional win: Fisher's biggest win is establishing and running the VR 4 Kids Program, which uses virtual reality headsets for pain management, meditation and relaxation. The program has improved children's experiences as they undergo long, isolating medical procedures, and informed technology enhancements by VR companies.

Other contributions: Fisher has served as a mentor through Wayne State University's PRSSA chapter, participates in nonprofit leadership cohorts and is a member of the Northeast Detroit Lions Club.
