

VR 4 Kids Program

Immersive Technology

Partners

Testimonials

There are over 100 hospitals in the US that have implemented virtual reality programming to help their pediatric population manage pain during medical procedures and aid them in relaxation.

Through our VR 4 Kids Program Pilot in partnership with XR Impact Network, we have found that these same benefits can be enjoyed at home. While our program started with children who are experiencing cancer, we are extending it beyond to wig recipients with other forms of hair loss.

We believe that our VR 4 Kids Program offers physical, emotional, social & psychological therapeutic experiences through this innovative & immersive technology!

Our immersive programming library, built over three years, is curated and secured through Beth Savoldelli at XR Impact Network. She works closely with us to design and implement unique, robust offerings, secure non-profit organizations and key technology partners that meet the specific needs of our kids

Many of the award-winning applications we utilize through our VR headsets include guided meditative activities, virtual pets, entertainment and more.

We have received Meta Quest 2 & 3 VR headsets from 18Loop and Invincikids through the generosity of our VR partners. An Apple Vision Pro has been donated by Stealth Consulting!

From the mouths of our kids...

"Through my VR headset, I visited other countries!"

"It made me feel so much better and more motivated to get up and do what I needed to in my day."

"Helped me center my thoughts so I could think clearly."

"My VR eases my anxiety before a test."

"I just floated in the air on a paper air plane."

"The apps are fun and they brightened my mood."

"I felt like I was in a different world and it made me happy!"

Cleanbox

Due to our children's compromised immune systems, proper sanitation is key. All VR devices utilized in our program are sanitized using Cleanbox technology. Cleanbox products use patented engineering of UVC light in LEDs to provide 99.999% decontamination of any shared or frequently used devices.

How to Join

If you are seeking to join VR 4 Kids, you must be a child in the Maggie's Wigs 4 Kids of Michigan program.

Families will be asked to fill out a contract and testing reports are requested throughout the duration of your VR use so we can track your child's progress.

Schedule an intake by calling:
